

# Eazy leaf<sup>®</sup>

## Vitalis Eazyleaf Assortment

Eazyleaf varieties feature a narrow leaf attachment and a high leaf count. With one cut from the base in the field or the kitchen, volumes of equally-sized, tasty leaves fall apart into individual pieces ready for the plate or to include in a mix, with no removal of cores necessary. Eazyleaf can be sold as a pre-cut mix, or as a whole head marketed to customers as a one-step, easy to prepare salad green.

Compared to traditional babyleaf spring mix, Eazyleaf brings more texture, flavor, volume, and shelf life, and allows for a wider harvest window. Eazyleaf culture also allows for better weed control, as it is possible to cultivate around young plants.

All Vitalis Eazyleaf varieties can be harvested by hand for whole heads, or mechanically for a mix. For mechanical or one-cut hand harvest, transplant or thin to 4" apart. For whole head harvest, 8" spacing is recommended.

All varieties in the Vitalis assortment have strong Downy Mildew (Bl, CA), Red aphid (Nr:0), and Tomato Bushy Stunt Virus (TBSV) resistance for the organic market.

### Buckley - Red Oakleaf

Buckley is a beautiful one-cut red oakleaf. Lobed, deep red glossy leaves grow in an upright rosette, forming a highly presentable mix or whole head. Pair with Hampton Eazyleaf for a vibrant display. Upright habit paired with strong disease resistance package make this an excellent choice for organic growers.

Harvest Period: Spring, Summer, Fall

Resistances: HR: Bl:16-32/CA1-8/Nr:0/TBSV.

### Capulin - Green Tango

A high leaf count, one-cut variety with good weight, and thick texture. This full sized green tango is well suited for hand or mechanical harvest. Appropriate for fall, winter and spring production. Not recommended for the heat period.

Harvest Period: Winter, Spring, Fall

Resistances: HR: Bl:16-27,29,31-32/CA1-8/Nr:0/TBSV.

## Ezrilla - Green Tango

This is a unique one-cut green tango. Ezrilla has incized, dark green outer leaves and a sweet, blanched center. We highly recommend this variety for adding texture, loft, and crunch to your mix. Strong disease resistance and slow bolting make Ezrilla an adaptable variety for many regions and seasons.

Harvest Period: Year-Round

Resistances: HR: Bl:16-32/CA1-8/Nr:0/TBSV.  
IR: Lettuce Mosaic Virus (LMV:1).

## Green Reef - Green Incised Tango

This unique one-cut lettuce is in a category of its own! Green Reef will add 3D loft and diversity to your mix. Highly serrated green leaves have a thick texture and a narrow attachment. Good for whole head or mechanical harvest. Green Reef has a compact growth habit, and can be spaced as close as 3". This variety has tremendous shelf life.

Harvest Period: Winter, Spring, Fall

Resistances: HR: Bl:16-32/CA1-8/Nr:0/ TBSV.

## Hampton - Green Oakleaf

Hampton is a voluminous, high leaf count one-cut oakleaf. Dark green, shiny, flexible leaves have a narrow attachment. Hampton is impressively slow to bolt and resists tipburn, making it a flexible variety for year-round production.

Harvest Period: Year-Round

Resistances: HR: Bl:16-32/CA1-8/Nr:0/ TBSV.  
IR: Lettuce Mosaic Virus (LMV:1).
