

Monastrell F1

A medium to large red onion with an attractive appearance for fresh market or storage.

- Uniform with a deep red color
- Strong plants and excellent size potential
- Suitable for transplant or direct sowing
- Good handling and storage characteristics

The second red onion in our portfolio, Monastrell matures slightly later than Cabernet and is larger in size. Highly adaptable, with a broad harvest window, this variety produces medium to large onions, averaging 3.5-4.0 inches. Featuring single-centers and excellent internal ring color development, Monastrell has a dark red exterior and a round to slightly flat shape. Bulbs are uniform and resistant to sunscald in the field. Vigorous plants have an upright habit and tight necks. These traits, combined with partial resistance to foliar disease, make Monastrell an excellent choice for organic growers from Canada to California. An Intermediate Day variety, this flexible onion can be harvested in the mid-intermediate to early long day slot depending on location and planting date. Contact your local representative for regional planting guidelines.

DAY LENGTH	Intermediate
STORABILITY	Medium (4-6 months)
SOWING PERIOD	Northern Hemisphere: January-April
HARVEST PERIOD	Northern Hemisphere: June-September
SHAPE	Globe to Flat Globe
